

## Geography

Welcome new Year 7's!

So it's been a funny few months going from primary and moving up to Secondary school. So welcome!

So I'm Mr Bailey and will be looking after your Geography education. Now most people think that Geography is all maps and rivers. To a point this is true, but Geography is so much more! You'll be learning all about how the world around you it formed, why we have certain weather, how countries cope with pandemics! We cover off a whole range of topics to entice you to look at the world a little bit differently.

During year 7 you will start to learn about the world around you. From looking at how to read and draw your own maps (I told you it would be in there!) to the weather around us and how it effects what's on the supermarket shelves.

Looking forward to getting our Geography geek on.

Mr Bailey.
