

Maths

Hello! My name is Mrs Bainbridge one of the maths teachers at Holy Family. We just wanted to tell you a few things about your maths lessons when you join us here. Firstly and most importantly, we believe that everyone can do maths. Everyone can.

We build on what you have already learned in primary school and we begin in year 7 investigating 'sequences and patterns' in both diagrams and numbers. We aim to develop your algebraic thinking, number sense and geometric reasoning.

In lessons we work together, discussing ideas using key terms, team working and problem solving. The topics are broken down into 'small steps' and are revisited in other contexts, to help you gain a deep understanding.

Together we aim to develop independent, reflective learners who have both a passion for and relish the challenge of maths. We can't wait to meet you all!
