

## Science

Hi Year 6

My name is Mr Wilde and I am Head of the Science Department at Holy Family. There are three more Science teachers: Mrs Tinning, Miss Camy and Mr Devlin.

In Year 7 you will have your lessons in our laboratories where you will learn through practical work and theory. You will be taught equal amounts of Biology, Chemistry and Physics (if you don't know what these subjects are all about you may like to do some research over the summer!) in addition to practicing the skills you will need to conduct meaningful practical work.

The topics you will study in Year 7 are as follows:

### BIOLOGY

Cells and Organisation

Skeletal and Muscular Systems

Relationships in an Ecosystem

Variation and Evolution

### CHEMISTRY

The Particulate Nature of Matter

Atoms Elements and Compounds

Pure and Impure Substances

Earth and Atmosphere

### PHYSICS

Energy Changes and Transfers

Changes in Systems

Forces

Space Physics

We are looking forward very much to meeting you all. Have a great summer and stay safe.
